Every private system on the portfolio comes with its architecture diagram.

Summary

Full-stack web developer with 4+ years of shipped work since April 2022. Main stack: PHP (Laravel, CodeIgniter) and Next.js. Software Engineer at Global Collabo Tech, a subsidiary of PT MINORI, which works with many clients in Japan, leading freelancers and interns on internal AI projects. Delivered SOBAT-PS, an information system the Forestry Office of North Kalimantan Province still runs, and published PolicySemVer, a versioning GitHub Action on GitHub Marketplace and npm.

Experience

Software Engineer — Jan 2026 – Present
Global Collabo Tech — Cikarang Selatan, on-site

- Continues the work started at PT MINORI.
- Leads a team of freelancers and interns on internal AI development projects for individual departments.

Full Stack Web Developer — Dec 2023 – Jan 2026
PT MINORI — Cikarang Selatan, on-site

- Built and maintained apps, mainly in Laravel.
- Maintained legacy CodeIgniter apps that are still in use.
- Started building with Next.js in 2026.

Contract Web Developer — Jul 2022 – Oct 2023
PT Heat Transfer Solutions Indonesia — Sidoarjo, remote

- Built a system for receiving service quotation requests.
- Migrated the company website to a new CMS setup (WordPress + Brizy).

Contract Web Developer — Apr 2022 – Sep 2023
Dinas Kehutanan Provinsi Kalimantan Utara (Forestry Office of North Kalimantan) — Bulungan, remote

- Built SOBAT-PS, the social forestry and community empowerment information system, with Laravel and Bootstrap. Still live on sobat-ps.kaltaraprov.go.id.
- Reviewed code, debugged, and wrote training documentation.

Projects

PolicySemVer | public — 2026

- GitHub Action + npm CLI for policy-first semantic versioning of deployed apps. v1.0.1 on GitHub Marketplace and npm. TypeScript, pnpm monorepo, Vitest.

Wedding invitation | private — 2026

- Next.js + Laravel/Filament with idempotent RSVP and strict CSP; turned into a static archive after the event, with no guest data published.

NIKKE Progression Calculator | private — 2026

- Three services sharing one Supabase Postgres database: Next.js 16 app (Vercel), NestJS 11 + Prisma 7 API (Railway), Laravel 13 + Filament 5 admin (Laravel Cloud).

Timetables | private — 2026

- Multi-stage festival schedules with clash detection and device time zones; v1 SvelteKit, v2 Next.js 16 on Cloudflare Workers + D1.

This portfolio | public — 2026

- Next.js 16 + Hono + D1 on Cloudflare Workers, public read-only API, manage area behind Cloudflare Access.

Education

Universitas Brawijaya — Aug 2018 – Jul 2023
